

Week 1 Research Summary & Week 2 Planning

Week 1 Achievements

- ☒ **Day 1-2:** Extension foundation with AI integration
- ☒ **Day 3:** 10+ VS Code commands with comprehensive testing
- ☒ **Day 4:** Full search functionality with file indexing
- ☒ **Day 5:** Feature research and prioritization (22 ideas → 3 proposals)

Week 2 Focus: Advanced AI Features

Recommended Feature: Smart Code Refactoring

Rationale:

- Directly improves developer productivity
- Builds on existing AI and search infrastructure
- Manageable 3-week implementation timeline
- High user satisfaction potential

Implementation Timeline (3 Weeks)

Week 2-1: Basic refactoring engine and UI

Week 2-2: Advanced refactoring patterns and testing

Week 2-3: Polish, user testing, and documentation

Success Criteria for Week 2

- Refactoring engine with 5+ common patterns
- User-friendly preview and application interface
- Zero breaking changes in refactoring
- Positive feedback from internal testing
